

EXPERIMENT 1 – Installation of Windows / Kali Linux Operating System

Aim: To install an Operating System (Windows / Kali Linux) on a computer using bootable installation media and verify its successful operation.

No runnable code — installation steps only.

Windows Installation Verification Commands

```
winver  
systeminfo  
hostname  
ipconfig
```

Kali Linux Verification Commands

```
uname -a  
cat /etc/os-release  
whoami  
hostname  
lscpu  
df -h
```

Result: The operating system was successfully installed and verified using system commands.
